Plan to attend the Office of Health Disparities of the American Cancer Society's 2009 conference on health disparities, HEALTH EQUITY: Through the Cancer Lens.

This year we move beyond description to action. Our 2009 conference will present consensus recommendations on cancer disparities in underserved populations as part of our collaboration with the National Medical Association (NMA). We will combine research, practice, academia, and community efforts to focus on best practices from an advocacy, community intervention, and communication perspective.

At the conclusion of this conference, participants will be empowered with the information and resources to act.
